**Road Closure on Monroe Street in South Norwalk at  
Metro-North RR Bridge  
To Begin On or About Tuesday, October 14, 2008**

**Norwalk, Connecticut** – Connecticut Department of Transportation officials have announced that there will be **nightly road closures** on **Monroe Street in South Norwalk**, under the Metro-North Railroad Bridge, between the Railroad Station Driveway and State Street, to remove the steel for a portion of the railroad bridge.

- **Beginning On Or About Tuesday Night, October 14 through Friday night, October 17**

**The roadway will be closed from 10:00 PM to 6:00 AM each night** that the work is scheduled, in order to remove the bridge steel for Track 1. Commuters will need to follow the posted detour signs during this time. During this time, local traffic will be permitted to access the railroad facilities, parking garage and residences, but no traffic will be allowed to pass below the bridge. Pedestrian traffic below the bridge will be maintained at all times.

Please allow for extra time to reach the train station and board your train. The Connecticut Department of Transportation understands the inconvenience of these closures and will complete this work as quickly as possible. Your patience and cooperation are greatly appreciated.

Traffic control personnel will be on site directing motorists and pedestrians during the construction operations.

This work is part of an ongoing project to replace bridges and catenary on the Metro-North New Haven Line between South Norwalk and Stamford.

The Connecticut Department of Transportation appreciates your patience as improvements and upgrades occur on the New Haven Rail Line. These projects support the State's continued effort to meet future needs on your public transportation system.
