

INTRODUCING THE NEW

CAPACITY ALERT/TEXT MESSAGING SERVICE

AT THE SOUTH NORWALK RAILROAD STATION

As part of our continuing efforts to better serve you, the Norwalk Parking Authority is happy to announce our new parking capacity alert/texting messaging service, which is designed to make your commute a little bit easier.

The program is very simple, by providing us with the name of your service provider and your cell phone number we can send you a text message alerting you when the South Norwalk Train Station parking facilities are about to reach or have reached full capacity. Having this information in advance of your travel to the SNRR station will greatly assist you in the event parking capacities have been reached.

Please note that information provided to the Norwalk Parking Authority for this service will not be shared or used as a marketing tool.

It's that easy! To get the information you need to make your commute a little easier, please contact Eleonor Volynsky, Customer Service Manager at (203) 831-9063 or evolynsky@lazparking.com
